Add Treatment Information

When is a New Treatment Required?

- Modality change A patient chooses to make a permanent change in modality.
 - For example, a Home patient on Continuous Cyclic Peritoneal Dialysis (CCPD) switches permanently to Incenter Hemodialysis (ICHD), or an ICHD patient starts Home dialysis training.
- Change in dialysis prescription A patient's physician chooses to shorten or lengthen a patient's treatment.
 - For example, an ICHD patient's treatment time changes from 210 minutes (3.5 hrs.) to 240 minutes (4 hrs.).
- Change in patient's physician A patient's physician changes.
 - For example, Dr. Grey leaves the practice and Dr. Shepherd becomes the patient's new physician.
